Education

- **KIET Group of Institutions** — **Expected 2027**
  B.Tech in Computer Science and Engineering — *SGPA: 7.8*
- **Sacred Heart Higher Secondary School** — **2021 – 2022**
  Higher Secondary Education (Class XII) — *Percentage: 91.4%*

Work Experience

Backend Developer Intern — **Jan 2026 – Apr 2026**
Klick N Fix Solutions LLP

- Designed the **real-time code sync system** for a collaborative interview platform using **Spring WebSocket and STOMP over RabbitMQ**, choosing this approach over WebSockets with CRDT to meet the **Agile sprint timeline**, with a documented migration path.
- Proposed and integrated **self-hosted Jitsi Meet** for embedded video calling in place of a paid third-party API, **removing per-minute billing** and external call latency.
- Designed and shipped **8+ secured REST APIs** for authentication, code execution and session management using **JWT authentication, bcrypt password hashing** and rate limiting; integrated **Judge0** for sandboxed code execution across **60+ languages**.
- Diagnosed a **database read-performance issue** on a parallel student ERP project at the project manager's request, working only from a whiteboard walkthrough and sample data without codebase access; proposed a revised **indexing strategy** that was **implemented in production** and resolved the slowdown.

Projects

RepoCrawl:AI Powered Github Repository Assistant | *Python, FastAPI, LangGraph, ChromaDB, Hugging Face API, React* — **Aug 2026**
GitHub

- Built **full-stack RAG application (FastAPI, React 19)** that indexes GitHub repositories and answers questions using retrieved code evidence with citations
- Implemented **LangGraph orchestration pipeline** integrating **ChromaDB vector search**, **Hugging Face embeddings, and LLM generation** for evidence-grounded responses
- Developed **evidence-based technology detection**, repository mapping, and confidence-scoring algorithms using **deterministic, non-LLM** logic for speed and reliability

Distributed Async Job Processing Platform | *Spring Boot, Redis, RabbitMQ, Docker, AWS* — **July 2026**
GitHub

- Architected a **fault-tolerant job processing platform** that decouples job submission from execution, using a **message queue** to distribute work across independently scaled worker instances.
- Designed **retry policies with exponential backoff and dead-letter queues** to isolate permanently failing jobs without blocking healthy job throughput.
- Built **idempotent job execution** using **Redis-backed deduplication keys**, preventing duplicate side effects when a job is retried or redelivered after a worker crash.
- Implemented **distributed locking** to coordinate exclusive access to shared resources across concurrent workers.

Position Doctor | *Java, Spring Boot, PostgreSQL, Spring Scheduling, REST APIs* — **May 2026**
GitHub

- Designed a **three-layer decision architecture** (position health, market context, fundamental strength) that evaluates trading signals independently, keeping recommendations **explainable** instead of relying on one merged score.
- Implemented **hard-constraint rules** so high-risk positions cannot score as healthy regardless of profit, and built a **rule-based recommendation engine** chosen over a weighted score for debuggability.
- **Built an alert engine** that fires only on primary-recommendation state transitions (not on every scheduler tick).

Additional project: Redis-based distributed rate limiter (Lua scripts) — GitHub

Technical Skills

- **Languages:** Java 17, Python, SQL, Javascript
- **Backend:** Spring Boot, Spring Security, Spring Cloud, REST APIs, Microservices
- **AI/RAG Systems:** LangGraph, ChromaDB, Hugging Face APIs, Retrieval-Augmented-Generation, LLM Integration, Vector Embeddings
- **Data:** PostgreSQL, MySQL, Redis
- **Messaging:** Apache Kafka, RabbitMQ, WebSockets (STOMP)
- **Tools:** Docker, Git, Postman, CI/CD, Linux

Achievements

- Solved **600+ DSA problems** across coding platforms; **3-Star CodeChef**; **Top 10** finish at Excalibur (NIT Kurukshetra); **Top 7** at VibeClash (GGSIPU).
- **AWS Certified Cloud Practitioner** (Foundational).
